Summary

Full Stack Developer with 1+ year of professional experience building scalable web applications with Laravel, NestJS, and React. Refactored over 80% of the company's codebase and single-handedly set up the entire VPS infrastructure, CI/CD pipelines, and DevOps workflows. Self-driven learner with 8+ years of personal projects.

Education

Bachelor's Software Engineering

Uninter · Mar. 2025 – Present
Systems architecture, requirements engineering, and project management.

Technical Diploma

Information Technology
Instituto Federal · 2018 – 2021
Algorithms, data structures, databases, web and mobile development.

Skills

Languages

JavaScript · TypeScript · PHP · SQL

Frontend

React · Next.js · Tailwindcss · HTML/CSS

Backend

Laravel · NestJS · Node.js · REST API · Express.js

Databases

MySQL · PostgreSQL · MongoDB · Redis

DevOps

Docker · Linux · CI/CD · AWS · Nginx

Tools

Git · GitHub Actions · Scrum · Automated Testing

Languages

Portuguese – Native

English – C1 (Advanced)

Lucas Jandrey

Full Stack Developer

Experience

Software Engineer @ Five Tech

Jun. 2025 – Present

- Built and maintained full-stack features using Laravel and NestJS (backend) with React and TypeScript (frontend).
- Designed and optimized relational database schemas, improving query performance on critical endpoints.
- Architected scalable software following MVC patterns, ensuring long-term maintainability.
- Wrote unit and integration tests, increasing codebase stability and reducing regression bugs.
- Provisioned containerized environments with Docker and managed deployments on Linux servers (Nginx, Traefik).
- Automated CI/CD pipelines with GitHub Actions, reducing deploy time from 2h to 15min (87% improvement).

Laravel · NestJS · React · TypeScript · Docker · CI/CD · GitHub Actions · SQL

Junior Developer @ Five Tech

Feb. 2025 – Jun. 2025

- Delivered full-stack features using Laravel (PHP) and React (TypeScript) in an agile team.
- Modeled relational database structures to support new business requirements.
- Led decision-making on legacy code refactoring, improving code readability and maintainability.

Laravel · React · TypeScript · MySQL · Docker · Git

Project Coordinator @ Eletroprev Engenharia

Jan. 2019 – Jan. 2025

- Managed concurrent projects with strict deadlines, delivering on time for multiple clients.
- Gathered requirements and aligned expectations through direct client communication.
- Made autonomous technical decisions and solved problems under tight deadlines.

Project Management · Communication · Problem Solving

Projects

Oeste Orgânicos

2023 – Present

Full-stack platform for organic product sales connecting producers and customers. Built with Laravel backend, React frontend, Redis queues for async processing, JWT auth, role-based access control, and Docker deployment on AWS.

Laravel · React · TypeScript · MySQL · Redis · Queues · JWT · AWS · Docker

Personal & Academic Projects

2017 – Present

Building projects since 2017: web systems with PHP and Laravel, frontend apps with React and TypeScript, REST APIs with Node.js, and Python automations. Portfolio on GitHub.

JavaScript · TypeScript · PHP · React · Node.js · MySQL · Python · Git
